

1. Open the Settings popup and select **Network time synchronization**.

2. Select the desired sync interval and warning threshold. To sync immediately, tap the **Sync now** button.

3. On success, the error of the system clock will be displayed in black font.

4. You can type specific time server, or leave the field blank for automatic server selection.

5. If you enter custom time server, tap **Sync now** button to synchronize. On error, a warning will be displayed with red font.
