

For quick time comparison within the next or previous 24 hours, you can scroll the map. Depending on the direction you scroll, the clocks will show time in the future or in the past. Look for the red scroll scale at the bottom of the map and the title of the tool bar.

Time from now

Time interval

Time mark

To return to the current time do one of the following:

- double-tap the map
- move the scroll mark to the center until you hear a click sound
- wait 10 seconds, the map will return to current time.

To prevent the map from going back to current time after 10 seconds:

- hold your finger in one of the corners of the map
