

1. In the clocks popup, tap the plus button to add a clock or select a location you want to change, and tap the **Country** cell.

2. In the countries search field, start typing **gmt** or **utc** (not case sensitive) and select it from the filtered list.
3. Scroll through the list, or type the hour offset (with sign), or type the time zone military name, then select it from the filtered list.

Note: On the map, GMT is shown with the coordinates of Greenwich, a district of south London. GMT with time offset is shown along the equator with the respective hour angle offset.
