

After selecting the **Send Feedback** option, an additional alert will appear, asking you whether you want to include application state information or not. If you want to contact us for a feature request, there is no need to send application state. If you are reporting a problem, sending the application state is extremely helpful for us.

It is important to note that:

- The information is sent to us by e-mail.
- After tapping the “Add information” button, you will have one more chance to cancel the sending.
- The information is sent to us in clear text and you can review it before sending. It is editable, so you can delete any part of it if you wish. We will greatly appreciate if you keep the relevant information in place.
- We will not share any part of the information we receive or the e-mail address we received the mail from with third parties. It is used solely to reproduce the problem (if any), or assist you to solve an issue.
- Your input will be considered when deciding which features to implement next.

Share with Friend opens the send mail dialog with a link to The World Clock application and product site filled in. You need to add recipients for the mail. You can edit the mail, or cancel the operation.
