Select Action menu:
Sel. to PDF(...)

Arrange images and text files in custom sort mode

Export to PDF using Google Docs

Select document
spreadsheet or
presentation file

Upload to GDocs

Download as
Portable
Document(pdf)

Edit text files

The collage illustrates the workflow for editing text files in the SuperFiles app:

- Main File List:** Shows a list of files including 'Saved Photos', 'Stokknes, Iceland. B-side', and 'french'. A blue arrow points from the 'french' file to the 'Edit' screen.
- Edit Screen:** Displays a text editor with a sample message about iTunes Connect. A blue arrow points from the 'Edit' button to the 'Save As' menu.
- Save As Menu:** Offers options to 'Save As', 'Text Encoding', 'Font', or 'Cancel'. A blue arrow points from 'Text Encoding' to the encoding selection screen.
- Text Encoding Screen:** Lists various encodings such as 'Unicode (UTF-8)', 'Cyrilic (Windows)', and 'Western (Windows Latin 1)'. A blue arrow points from this screen to the font selection screen.
- Select Font Screen:** Allows choosing a font (e.g., 'Verdana-Bolditalic', 'GurmukhiMN') and a color for the text. A blue arrow points from the 'french' file in the main list to this screen.

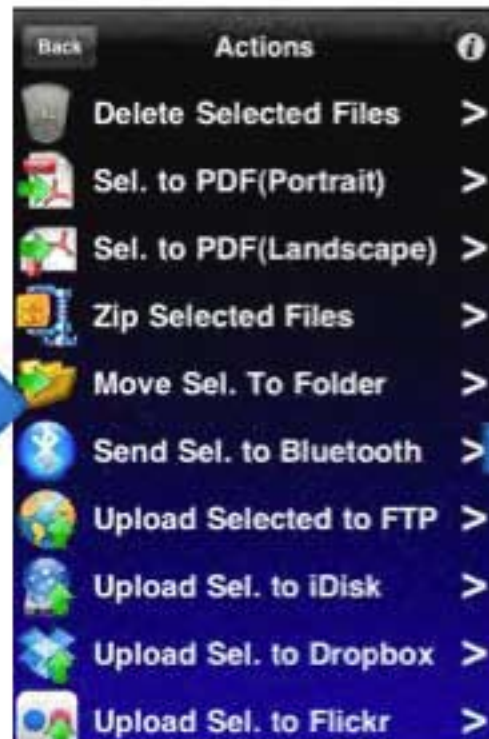

You can change text encoding, font and background and text color.

Send files via Bluetooth

Click Cloud button
on recipient device

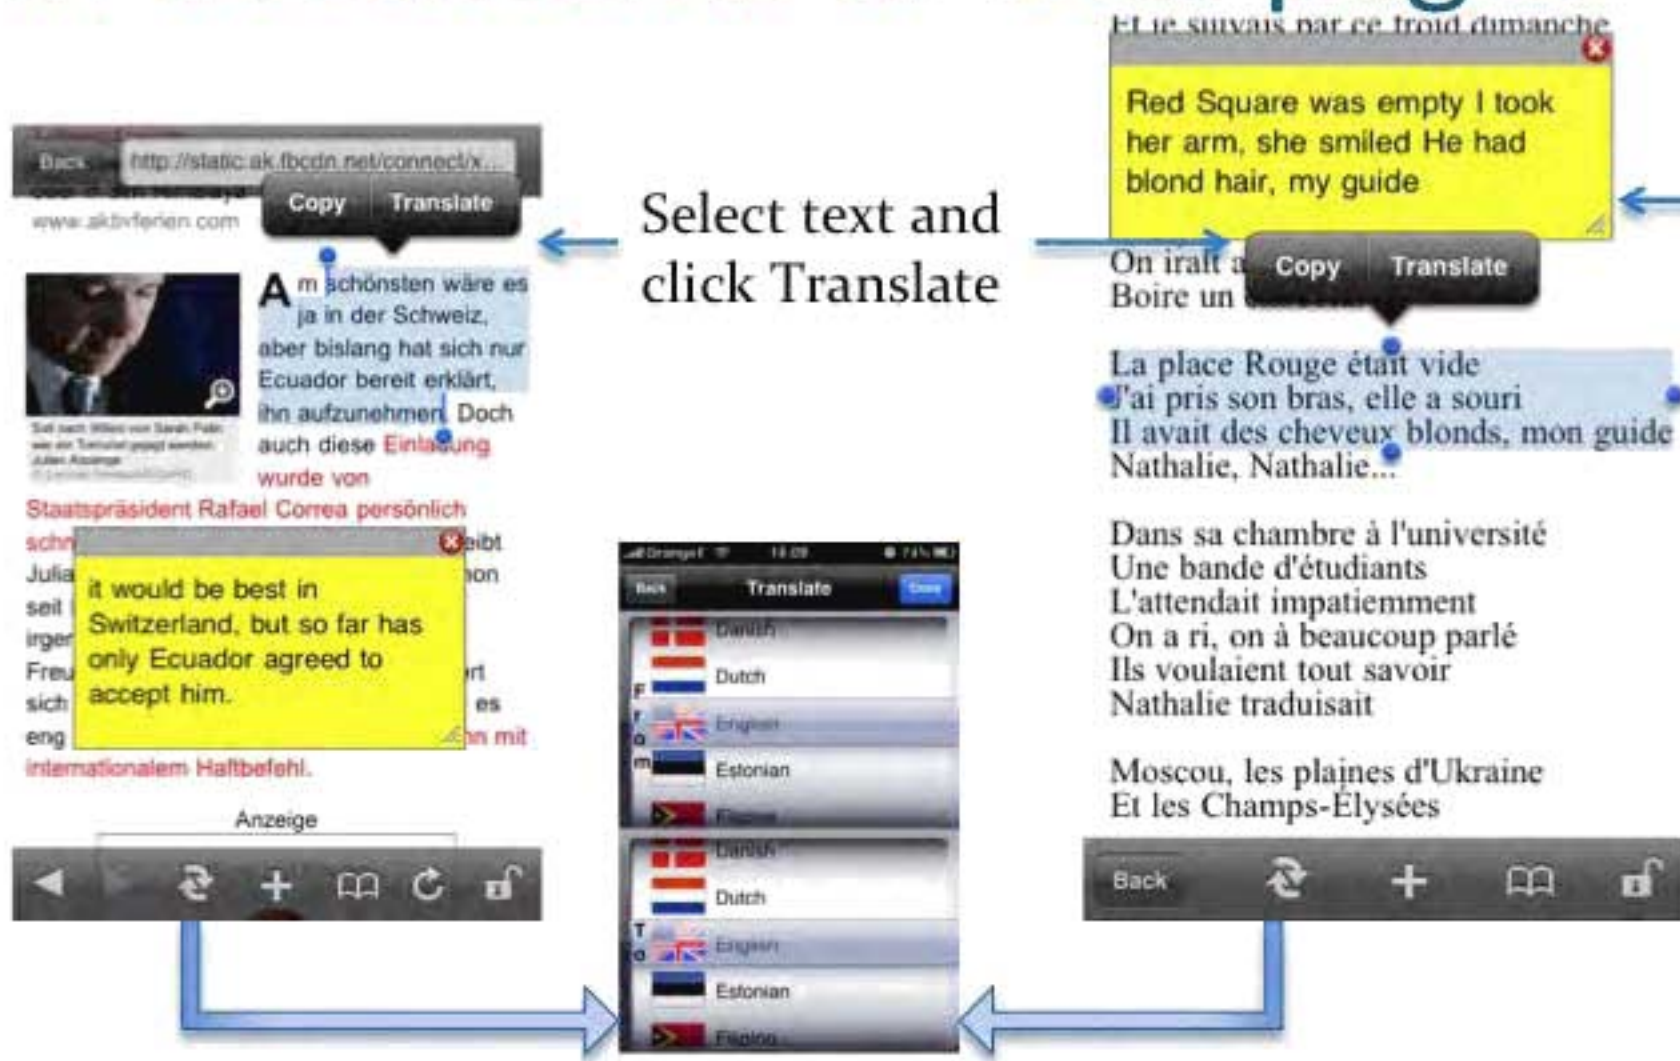

Select files you
want to send and
click Actions
button

As soon as
connection will be
established files
will be send

Translate words and phrases in documents or web pages
