Share Files (WebDAV). Part 1.

10

You can access to your files via WiFi from any Mac or PC and drag and drop files straight from the Finder or Windows Explorer, as you would with any other shared folder.

To connect from PC you need to install a WebDAV client, for example NetDrive application(www.netdrive.net)

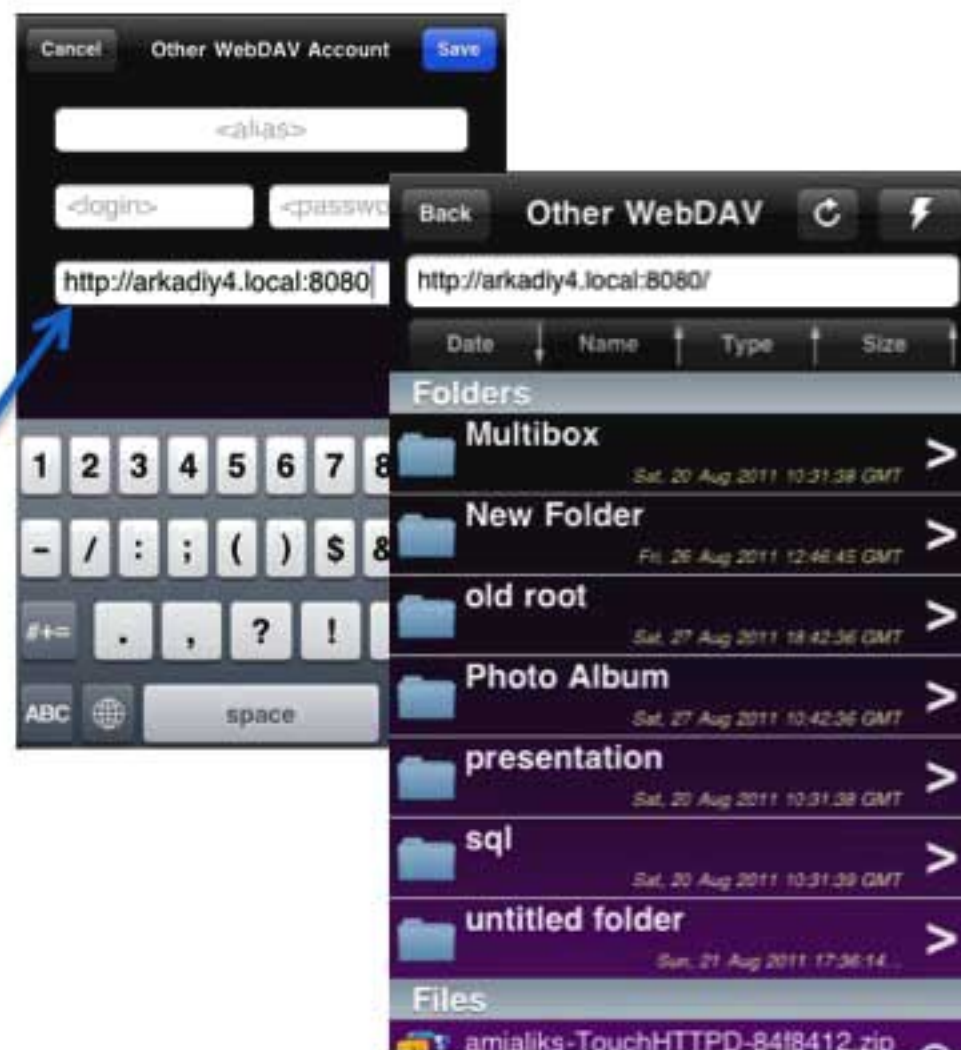

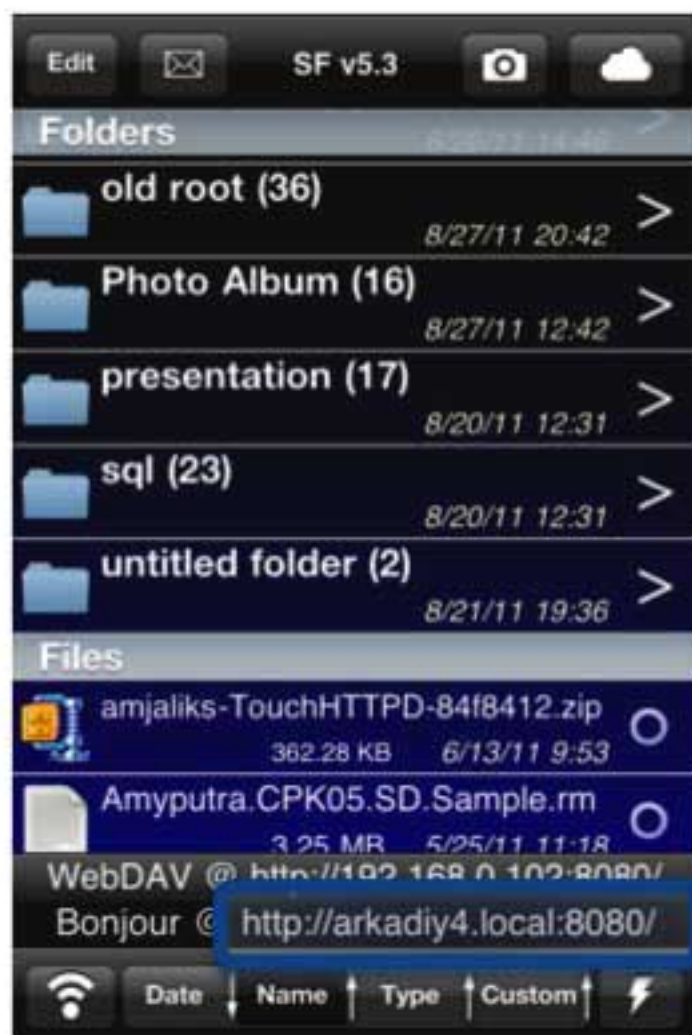

Share Files (WebDAV). Part 2.

11

You can also access to your files from another instance of SuperFiles running at the other iPhone or iPad.

Configure "Other WebDAV" account and manage files over the network.

OCR Procedure. Part 1.

OCR procedure. Part 2.

13

Enhance for better OCR

Select text to OCR

Crop and OCR
Send to Google
for OCR

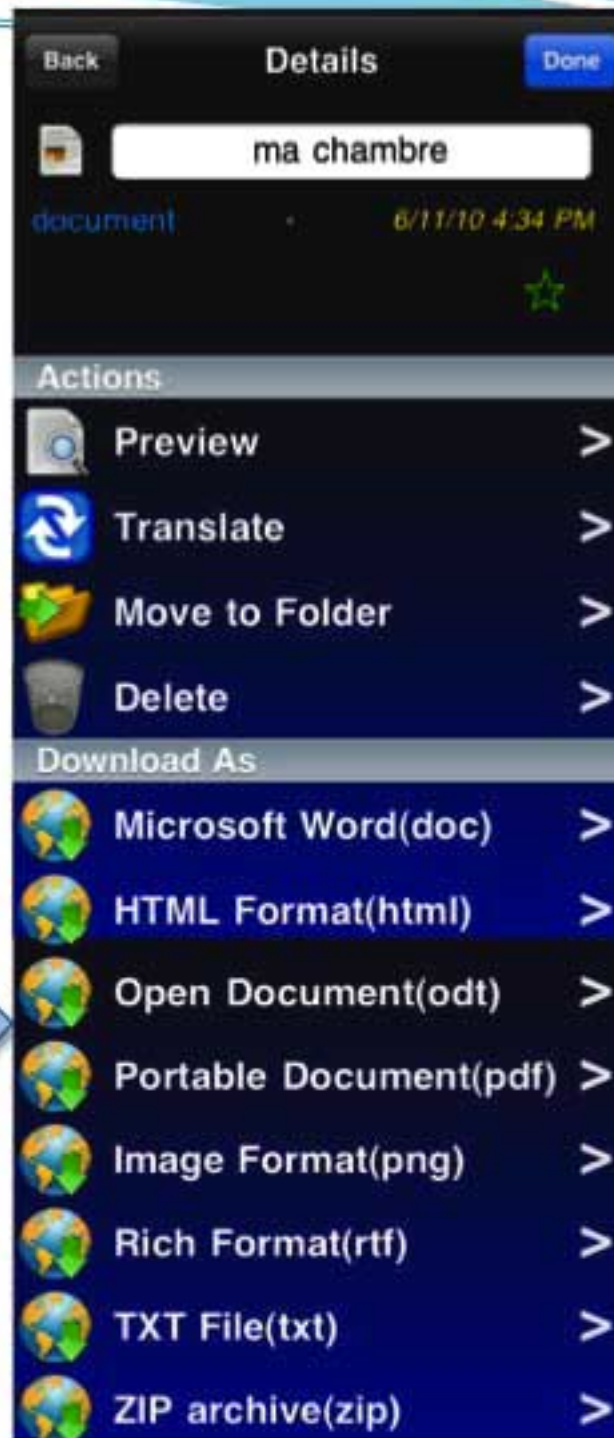

Google Docs

14

Click icon to preview

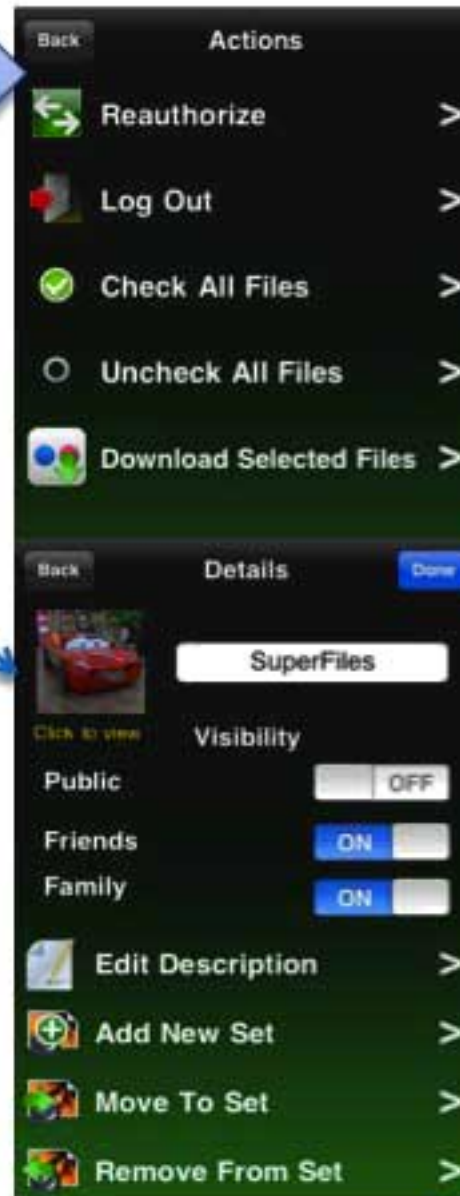

You can view files stored on Gdocs and edit xls files

Flickr

Your photos

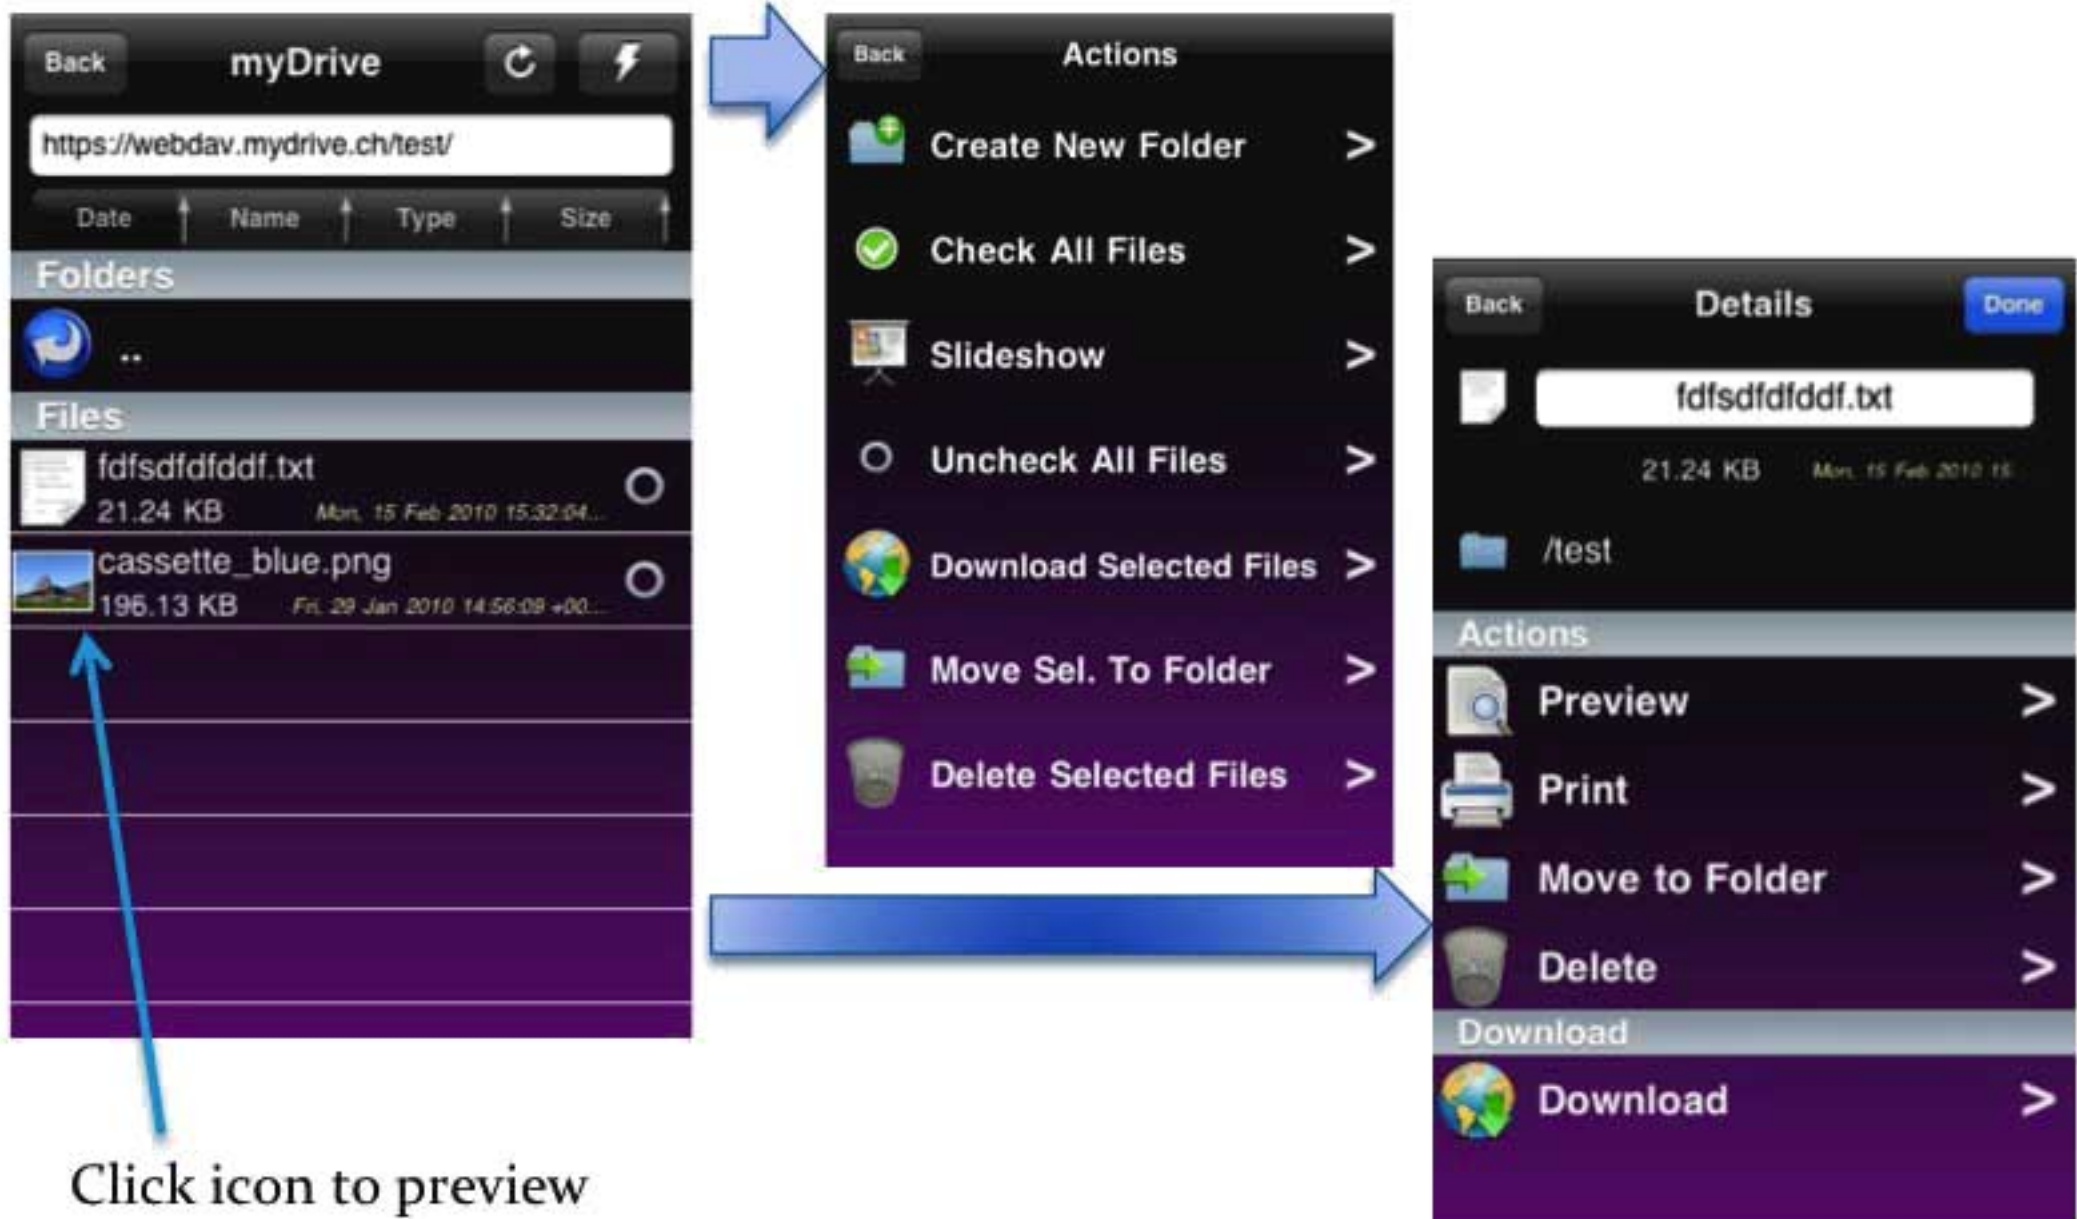

Click icon to preview

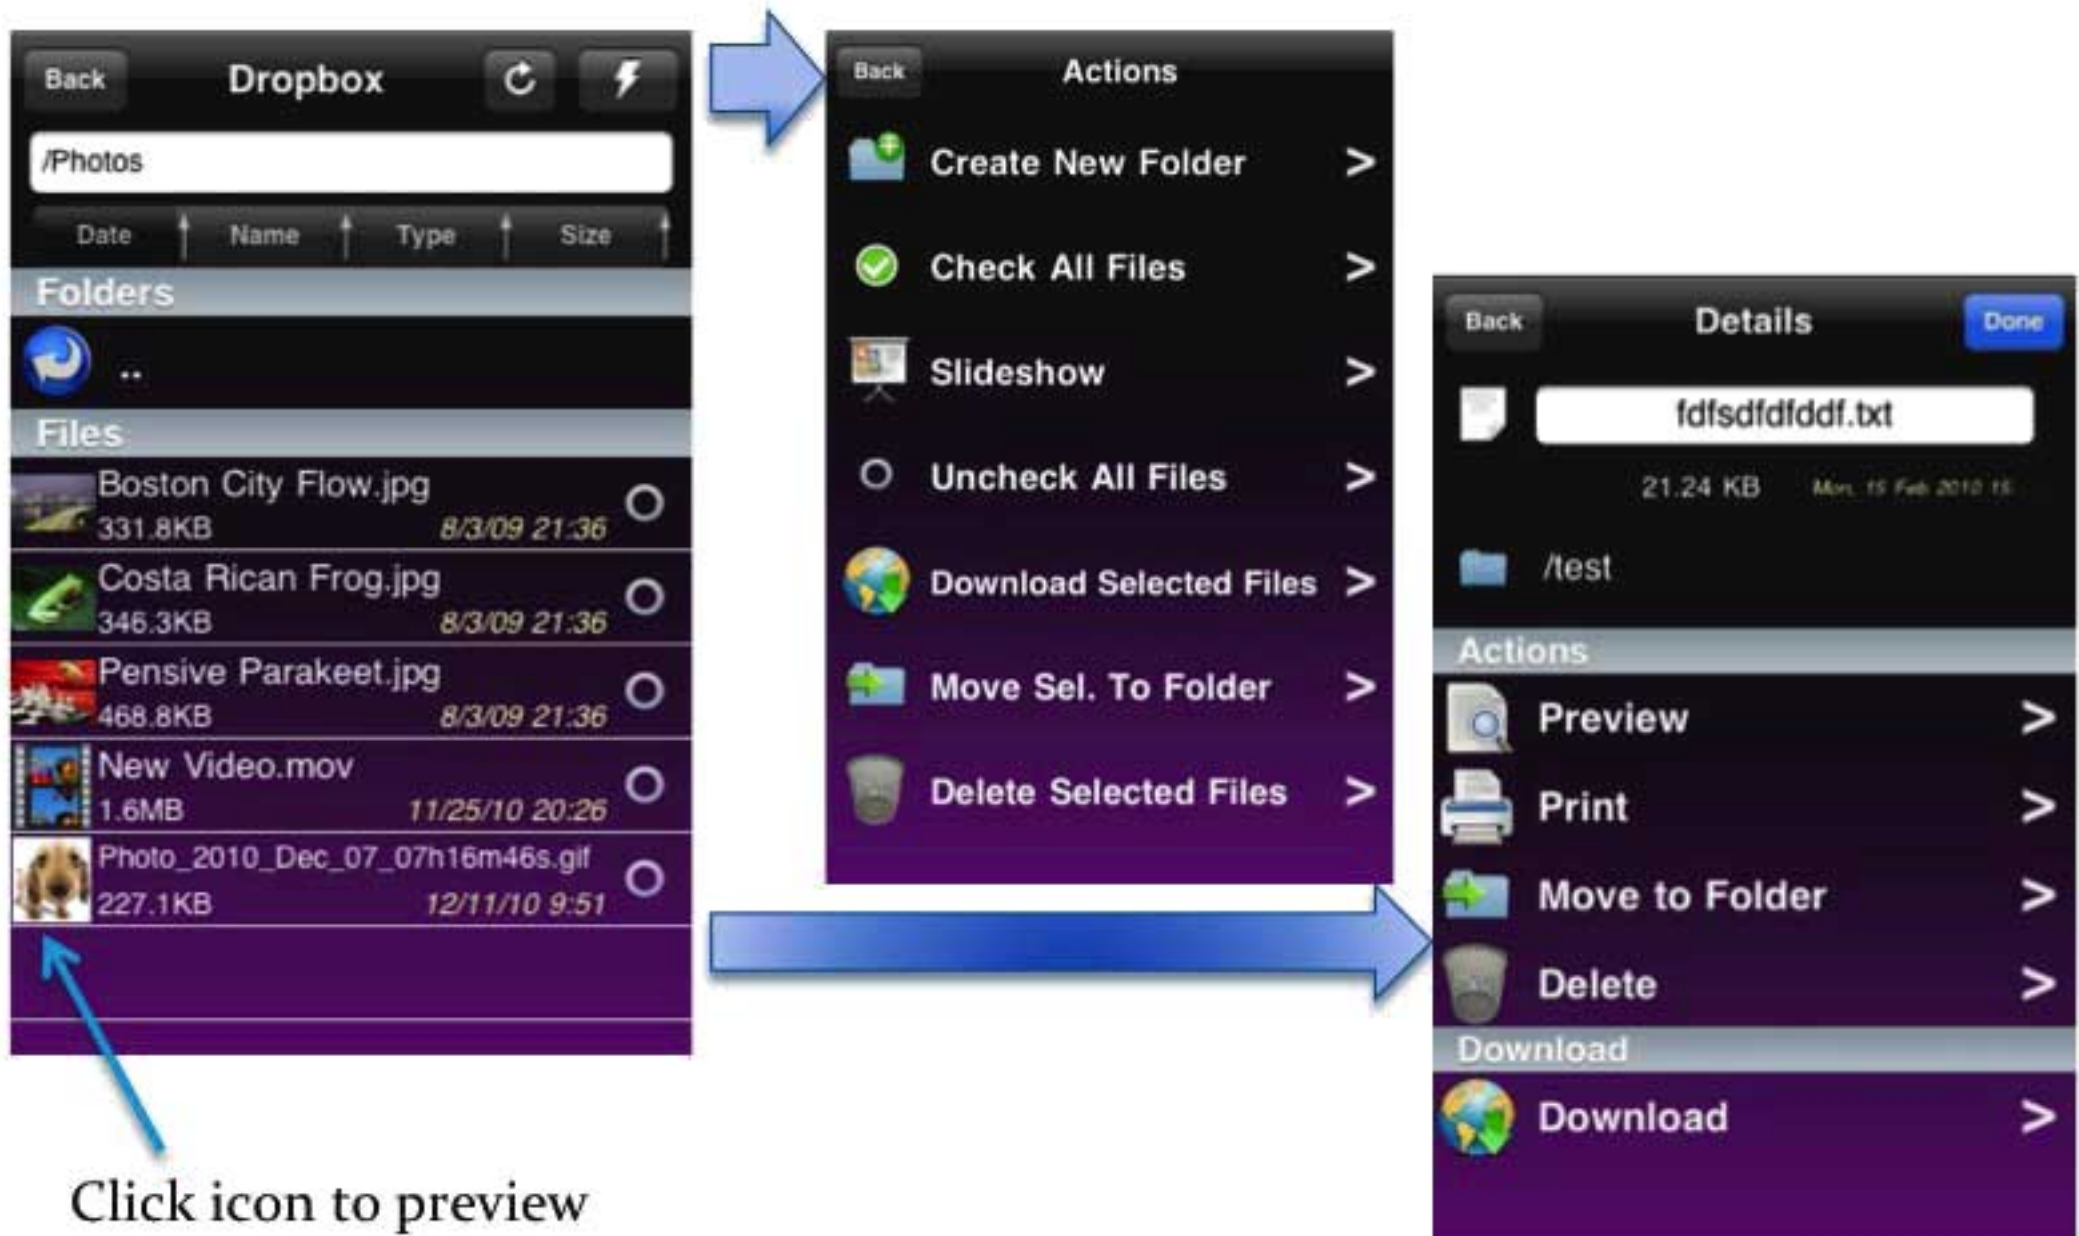

Interesting photos

iDisk (MobileMe) and other WebDAV servers

Dropbox

Download files from HTTP

Option 1: enter the link

Option 2: replace `http://` with `sf://` in Mobile Safari

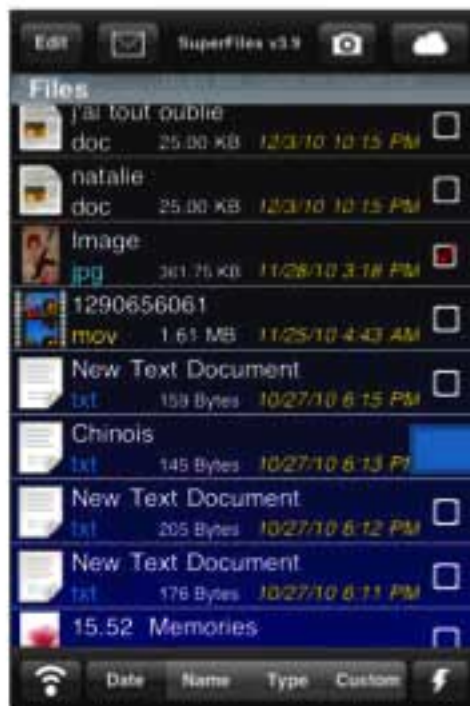

This will launch SuperFiles and start downloading your file.

Enjoy!

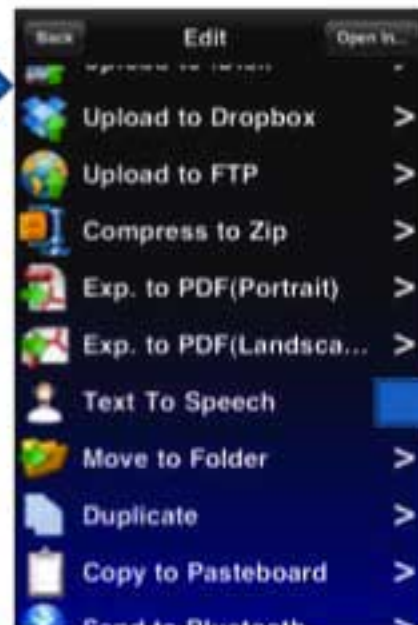

Text To Speech

Select text file with txt extension

Select text and press play button

You can export text to mp3 files

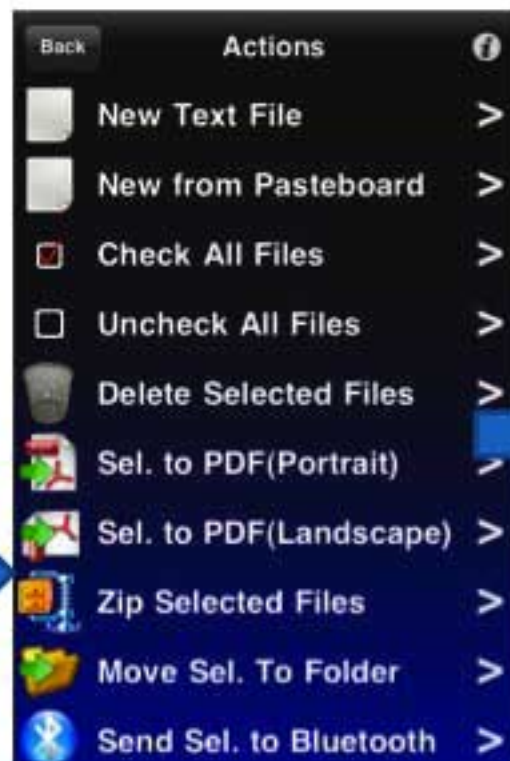

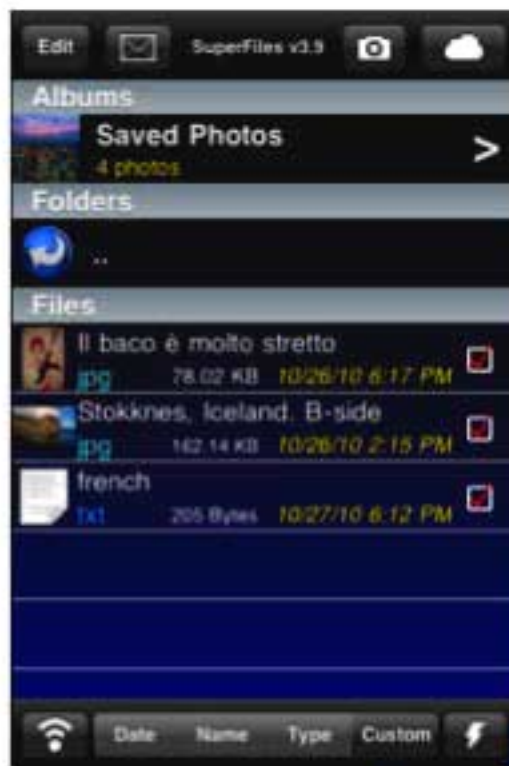

Select speech language

Export to PDF

Select images and text files to export

PDF file with mixed content will be generated

Sel. to PDF(...)

Il baco è molto stretto
Stokknes, Iceland. B-side
french

Arrange images and text files in custom sort mode

Export to PDF using Google Docs

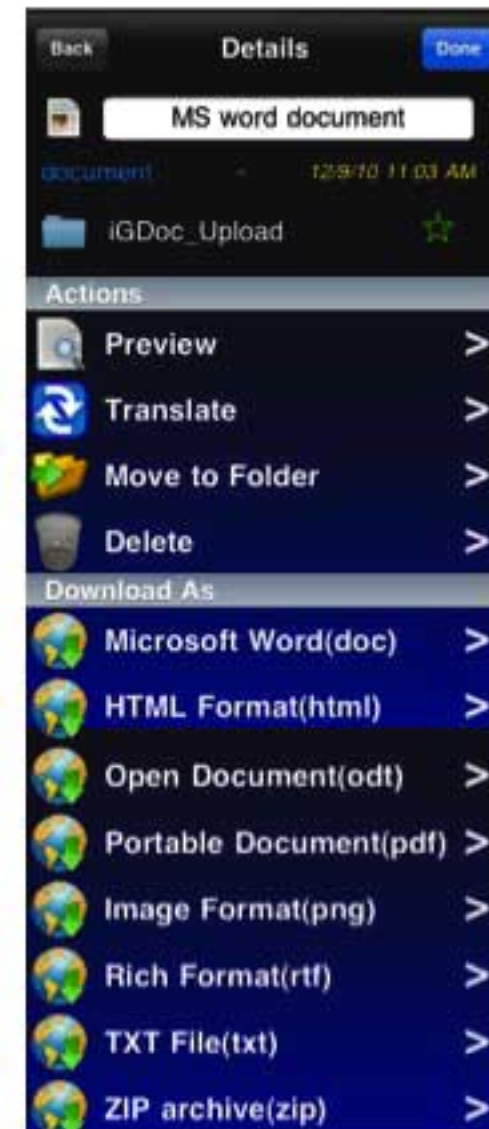

Select document
spreadsheet or
presentation file

Upload to GDocs

Download as
Portable
Document(pdf)

Edit text files

The image illustrates the editing capabilities of the SuperFiles app through a sequence of five screenshots:

- Files List:** Shows a list of files. The file 'french.txt' (205 Bytes, 10/27/10 6:12 PM) is selected.
- Edit Screen:** Displays the text content of the file. The text reads: "iTunes Connect provides tools to help manage your content in the App Store. iTunes Connect will be temporarily shut down from Thursday, December 23 to Tuesday, December 28 for the winter holidays. Do not schedule any pricing changes that will take effect during this time. Scheduled between these dates will be unavailable for purchase. Note". A keyboard is visible at the bottom.
- Save As Menu:** A modal menu with four options: 'Save As', 'Text Encoding', 'Font', and 'Cancel'.
- Text Encoding Selection:** A screen titled 'Text Encoding' showing 'Recent Encoding' as 'Unicode (UTF-8)' (selected with a green checkmark). Other options include 'Cyrilic (Windows)' and 'Western (Windows Latin 1)'.
- Select Font:** A screen titled 'Select Font' showing a list of fonts: 'Verdana-BoldItalic' (17), 'Verdana-Italic' (18), 'Verdana' (19), 'GurmukhiMN' (20), and 'GurmukhiMN-Bold' (21). A color picker is visible on the right.

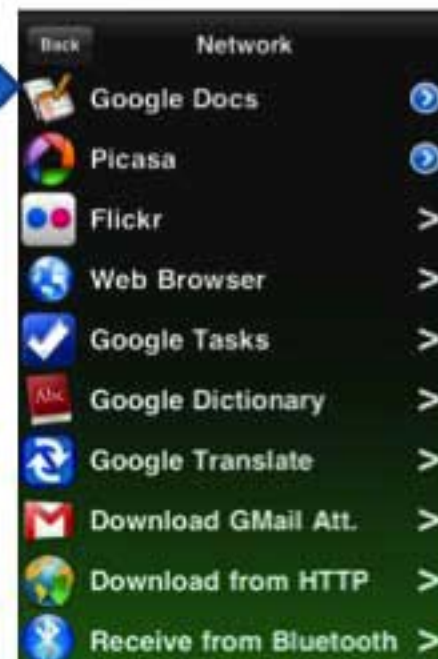

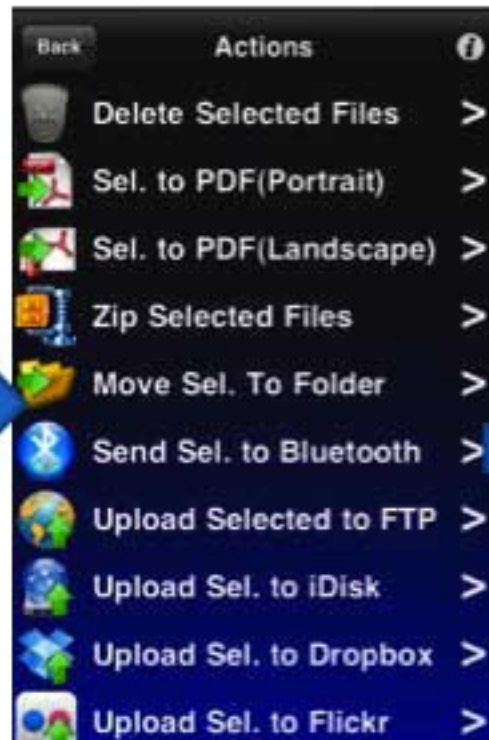

You can change text encoding, font and background and text color.

Send files via Bluetooth

Click Cloud button
on recipient device

Select files you want
to send and click
Actions button

As soon as
connection will be
established files
will be send

Translate words and phrases in documents or web pages

Select text and
click Translate

You can resize
and move this
window

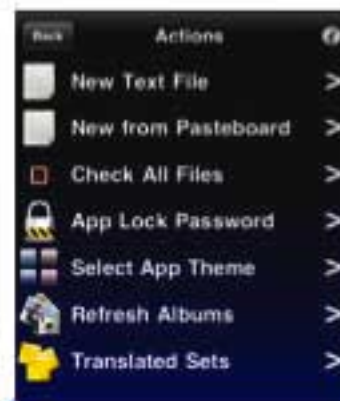

Click icon to select source and target language

Create set of translated words and export to xCards application.

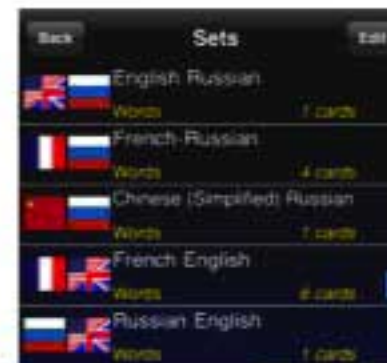

Click + to add word to the set

From the main screen select action

From the action menu click Translated sets

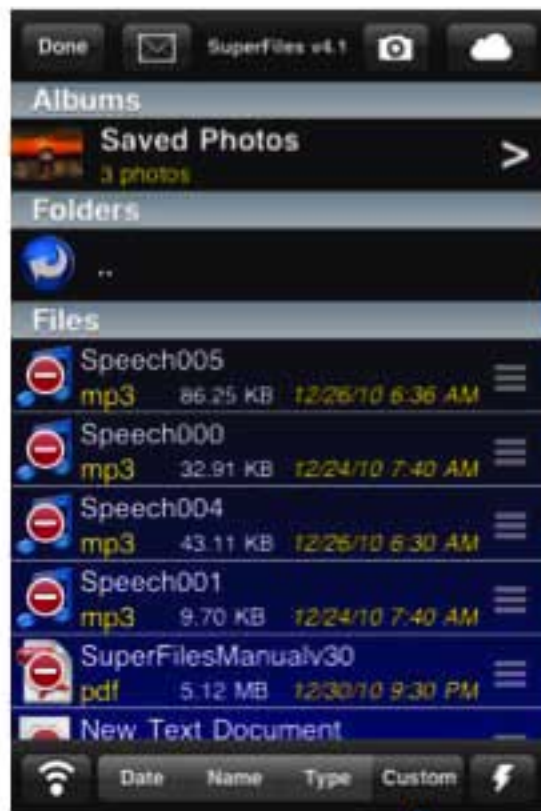

Select set and click Open In...

Click xCards button to export set to flash cards application to study words

Merge mp3 files

Select mp3 files to merge

Arrange mp3 files in custom sort mode

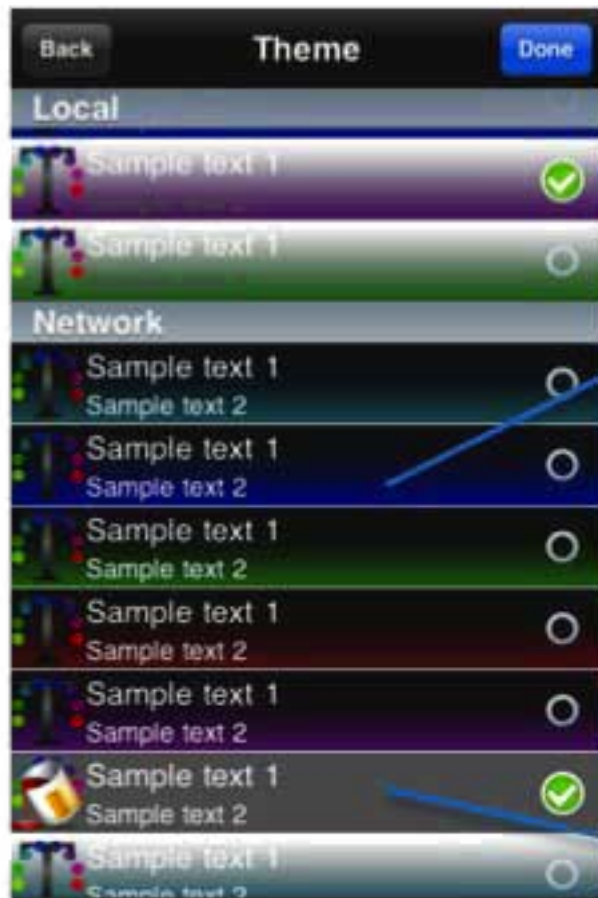

New mp3 file will be created

Select Action menu:
Merge Selected Mp3 Files

Select App Theme

Select current app theme

Customize text color

Customize text color and background

Search and highlight text
